

### List of Publications of Subinay Dasgupta

1. Homogeneous deformation theory with three body interaction : Second- and third-order elastic constants of noncentrosymmetric crystals, S. Dasgupta, Phys. Rev. B **30** (1984) 7250-4.
2. Three body interaction and fluorite structure : Elastic properties of CaF<sub>2</sub>, SrF<sub>2</sub>, and BaF<sub>2</sub>, S. Dasgupta, A. N. Basu and A. Basu, Phys. Rev. B **30** (1984) 7255-60.
3. Evaluation of a new lattice sum, S. Dasgupta and S. Sengupta, J. Phys. C **18** (1985) L47-50.
4. Homogeneous deformation theory for piezoelectric crystals, S. Dasgupta and S. Sengupta, J. Phys. C **18** (1985) 2209-15.
5. Homogeneous deformation theory for noncentrosymmetric ionic crystals in quadratic response regime : Antipiezoelectricity, S. Dasgupta and S. Sengupta, Phys. Lett. A **107** (1985) 266-8.
6. Homogeneous deformation theory for piezoelectric crystals using Ewald transformation and relationships among electrostatic contributions to second- and third-order elastic constants, S. Dasgupta and S. Sengupta, Phys. Rev. B **31** (1985) 8275-9.
7. A simple approach to evaluation of lattice sums, S. Dasgupta, D. Sen and S. Sengupta, Pramana **25** (1985) 597-601.
8. Theoretical study of superionic SrCl<sub>2</sub> below critical temperature by a simple model, S. Ghosh and S. Dasgupta, Phys. Rev. B **35** (1987) 4416-9.
9. Antipiezoelectricity in fluorite structure : Macroscopic quadrupole moment distribution, S. Dasgupta and S. Sengupta, Solid State Commun. **62** (1987) 789-90.
10. Correct formulation of lattice dynamics of molecular crystals, S. Dasgupta and S. Sengupta, J. Phys. C **20** (1987) 1611-7.
11. Elastic anomalies of superionic fluorites - A dynamical approach, S. Dasgupta, J. Phys. C. **21** (1988) L1011-4.
12. Specific heat anomaly of superionic fluorites - A dynamical approach, S. Dasgupta, Phys. Lett. A **133** (1988) 501-5.
13. Monte-Carlo phase diagram of an Ising system with isotropic competing interaction, B. Pal and S. Dasgupta, Z. Phys. B **78** (1990) 489-92.
14. More on inverse sprinklers, S. Dasgupta, P. Mitra and S. Sengupta, European J. Phys. **11** (1990) 311.

15. On the 2D ANNNI model in free fermion approximation, S. Dasgupta, Phys. Lett. A **146** (1990) 181-4.
16. On the BNNNI model in free fermion approximation, S. Dasgupta, J. Phys. A **24** (1991) 1017-21.
17. Statistical mechanics of the 1D ferromagnetic ANNNI chain under an external field : revisited, N. Bhattacharyya and S. Dasgupta, J. Phys. A **24** (1991) 3927-34.
18. Numerical estimate of the phase diagram of finite ANNNI chains in transverse field, P. Sen, S. Chakrabarty, S. Dasgupta and B. K. Chakrabarti, Z. Phys. B, **88** (1992) 333-338.
19. Monte Carlo simulation of the shape space model of immunology, S. Dasgupta, Physica A **189** (1992) 403-410.
20. A model for ageing with hereditary mutations, S. Vollmar and S. Dasgupta, J. de Physique I (France) **4** (1994) 817-822.
21. A Computer Simulation for Biological Ageing, S. Dasgupta, J. de Physique I (France) **4** (1994) 1563-1570.
22. Boundary effects in the three dimensional Ising model, S. Dasgupta, D. Stauffer and V. Dohm, Physica A **213** (1995) 368-375.
23. Magnetization anomaly in Ising metamagnets, W. Selke and S. Dasgupta, J. Magn. Mater. **147** (1995) L245-L249.
24. Ising metamagnet under staggered field, S. Dasgupta, J. Stat. Phys. **81** (1995) 837-842.
25. Genetic crossing vs cloning by computer simulation, S. Dasgupta, Int. J. Mod. Phys. C **8** (1997) 605-608.
26. Dynamics of antiferromagnetic Ising model with fixed magnetisation, P. Sen, S. Dasgupta and D. Stauffer, Eur. Phys. J. B **1** (1998) 107-110.
27. Quantum hopping models for kinetic processes, S. Dasgupta, Phys. Rev. E, **62** (2000) 2945-2948.
28. A model of aggregation and dissociation, S. Dasgupta, J. Phys. A : Math. Gen. **33** (2000) L339 - L344.
29. Fluctuation of population in Penna model, S. Dasgupta, Theory in Biosciences **120** (2001) 29-32.

30. Why sexual reproduction ? Why four bases ? S. Dasgupta, *Physica A* **298** (2001) 465-470.
31. Analysis of predominance of sexual reproduction and quadruplicity of bases by computer simulation, S. Dasgupta, *Int. J. Mod. Phys. C* **12** (2001) 1055-65.
32. Structure and dynamics of thin polymer films : A case study with the bond-fluctuation model, C. Mischler, J. Baschnagel, S. Dasgupta and K. Binder, *Polymer* **43** (2002) 467-476.
33. Short-time scaling in the critical dynamics of an antiferromagnetic Ising system with conserved magnetisation, P. Sen and S. Dasgupta, *J. Phys. A*, **35** (2002) 2755-60.
34. Computer Simulation of Biological Ageing - A Bird's-Eye View, S. Dasgupta, *Physica Scripta* **T106** (2003) 19-20.
35. Small-world properties of the Indian Railway Network, P. Sen, S. Dasgupta, A. Chatterjee, P. A. Sreeram, G. Mukherjee and S. S. Manna, *Phys. Rev. E* **67** (2003) 036106.
36. Persistence and dynamics in ANNNI chain, P. Sen and S. Dasgupta, *J. Phys. A* **37** (2004) 11949-11956.
37. A Small World Network of Prime Numbers, A. K. Chandra and S. Dasgupta, *Physica A* **357** (2005) 436-446.
38. Floating phase in the one-dimensional transverse axial next-nearest- neighbour Ising model, A. K. Chandra and S. Dasgupta, *cond-mat/0612144*, *Phys. Rev. E* **75** (2007) 021105.
39. Dynamics of unvisited sites in presence of mutually repulsive random walkers, P. K. Das, S. Dasgupta and P. Sen, *J. Phys. A* **40** (2007) 6013-6022 .
40. Spin-spin correlation in some excited states of the transverse Ising model, A. K. Chandra and S. Dasgupta, *J. Phys. A* **40** (2007) 5231-5239.
41. Floating Phase in 2D ANNNI Model, A. K. Chandra and S. Dasgupta, *J. Phys. A* **40** (2007) 6251-6265.
42. Multidimensional persistence behaviour in an Ising system, A. K. Chandra and S. Dasgupta, *Phys. Rev. E* **77** (2008) 031111 (1-5) .
43. Phase of Ising spins on modular networks analogous to social polarization, S. Dasgupta, R. K. Pan, and S. Sinha, *Phys. Rev. E* **80** (2009) 025101(R).

44. Phase Transition in a Long Range Antiferromagnetic Model, A. Ganguli and S. Dasgupta, Phys. Rev. E. **80** (2009) 031115 (1-3).
45. Phase transition in a Quantum Ising Model with Long Range Interaction, A. Ganguli and S. Dasgupta, published in Proceedings of *International Workshop on Quantum Phase Transition and Dynamics : Quenching, Annealing and Quantum Computation*, Lecture Notes in Physics, Vol. 802, (Springer-Verlag, 2010) Chapter 12, p. 251 - 266.
46. Modular organization enhances the robustness of attractor network dynamics, N. Pradhan, S. Dasgupta and S. Sinha, EPL, **94**, (2011) 38004 p1-p6.
47. Chimera order in spin systems, R. Singh, S. Dasgupta and S. Sinha, EPL, **95**, (2011) 10004 p1-p5.
48. Transverse Ising Chain under Periodic Instantaneous Quenches: Dynamical Many-Body Freezing and Emergence of Slow Solitary Oscillations, S. Bhattacharyya, A. Das, S. Dasgupta, Phys. Rev. B **86**, (2012) 054410 (1-7), arXiv:1112.6171
49. Quantum time of arrival distribution in a simple lattice model, S. Dhar, S. Dasgupta and A. Dhar, J. Phys. A **48** (2015) 115304 (1-90).
50. Detection of a quantum particle on a lattice under repeated projective measurements, S. Dhar, S. Dasgupta, A. Dhar and D. Sen, Phys. Rev. A **91** (2015) 062115 (1-10).
51. Signature of a continuous quantum phase transition in nonequilibrium energy absorption: Footprints of criticality on higher excited states, S. Bhattacharyya, S. Dasgupta and A. Das, Scientific Reports, **5** (2015) 16490 (1-9).
